

## *MIPS Consulting: Let OFMQ Help in 2017*

The MACRA Quality Payment Program combines the existing Medicare Meaningful Use (MU), Physician Quality Reporting System (PQRS), and Value-Based Modifier (VBM) programs into MIPS, starting with the CY2017 performance year. MIPS defines three categories of eligible clinician performance: Quality, Advancing Care Information, and Improvement Activities. Each contributes to an annual MIPS final score of up to 100 points. The categories and weights for each are subject to change each year.

The final score earned by a clinician for a given performance year then determines MIPS payment adjustments in the second calendar year after the performance year. For example, CY2019 being the payment adjustment year for the CY2017 performance year. Furthermore, each clinician’s annual final score is released to the public by CMS.

*Guidance, training, and assistance the way you want it.  
Choose the package that best fits your specific practice needs.*

Standard Bundle	Deluxe Bundle *Most Popular*	Premiere Bundle	Custom
